victims,  
the truth will win out...”**

## Who Is Harold Manner?

For more than 30 years Dr. Harold Manner has been involved in research; in specific, *metabolic research* — the study of the process by which the body converts food to useable energy.

Since 1971, Dr. Manner has been involved in the study of pollutants and how they will affect susceptible tissues. This has led directly to his study of cancer, his subsequent findings, and his belief that "body cells are constantly being bombarded by carcinogens and that these substances cause normal cells to become cancerous."

Born July 31, 1925 in Brooklyn, New York, Dr. Manner received his Bachelor of Science degree from John Carroll University in 1949; his Master of Science degree from Northwestern University in 1950 and his Ph.D. from Northwestern University in 1952.

He has held professional positions at the following Universities and Colleges:

Visiting Ass't Professor of Biology.

Kenyon College — 1952-1953

Assoc. Professor of Biology, Utica College of Syracuse University — 1953-1962

Chairman of the Division of Science & Mathematics and Professor of Biology, Utica College — 1963-1969

Chairman of the Department of Biology and Professor of Biology, St. Louis University — 1969-1972

Chairman of the Department of Biology — 1972-1978 and Professor of Biology, Loyola University of Chicago — 1978-1982. Retired — July 1982.

Dr. Manner's professional involvements include membership in the *American Association for the Advancement of Science*, the *Society of Sigma Xi*, the *American Association of Anatomists*, and the *American Fisheries Society*.

He is listed in *American Men of Science* and *Who's Who in America*.

In addition to the time spent in research, and every weekend spent traveling and lecturing, Manner maintained a full teaching schedule at Loyola. Often described as "the most popular professor on the campus", Manner's teaching areas were General Biology, Comparative Anatomy, Comparative Embryology, Experimental Embryology, Anatomy and Physiology (for paramedical students), and graduate level courses in development.

Manner has written several books; his latest "*The Death of Cancer*" is the most widely read.

## Why Is There A Difference?

### **Some People Say...**

*"The United States has the finest health care in the world."*

### **I Say...**

*"The United States has no health care, only disease care. I don't believe medications belong in the body. The human body is designed in such a way that it can self repair. Many of the things we use do more damage than good. Antibiotics will kill the bugs, but they will also kill the 'friendly flora'; the necessary body bacteria."*

### **Some People Say...**

*"Our environment is such that we have no choice; everything is cancer causing. We might as well just live with it."*

### **I Say...**

*"Many of the things we eat, drink and use are unnatural and contain carcinogens – pollutants. But, we can prepare our bodies to deal with these things through good nutrition, exercise, and so on."*

### **Some People Say...**

*"Laetrile contains cyanide, therefore it is toxic and dangerous."*

### **I Say...**

*"Laetrile is actually a natural food product found in most fresh fruits, the exceptions being citrus fruits. Another name for laetrile is Vitamin B17; a vitamin which we all need."*

### **Some People Say...**

*"Research has only been done on mice with breast cancer. People are not mice."*

### **I Say...**

*"Completed case studies are constantly coming in from our clinics across the nation showing that metabolic therapy does work. We've got a success factor of 68 percent. That means the cancer has regressed to the point of being eliminated, or is not considered a life threat."*

### **Some People Say...**

*"The FDA and the American Cancer Society have come out saying that laetrile is useless."*

### **I Say...**

*"We got the same negative results when we used laetrile by itself. When we used it with enzymes and other vitamins on mice that had contracted cancer 'naturally', we found it to be very effective."*

### **Some People Say...**

*"The orthodox medical community sees the use of metabolic therapy as a fad, something that may be dangerous; even kill people."*

### **I Say...**

*"The skepticism and antagonism doesn't bother me because I know the they will come around, and the truth will win out."*

## What Is Metabolic Therapy?

Metabolic therapy, put simply, is the use of natural food products and vitamins to prevent and treat cancer by building a strong immune system.

*"The key to stopping the cancer growth doesn't lie in traditional cancer treatments like chemo and radiation therapy, or surgery; but in an approach that works with the body instead of against it."*

Once the body is cleansed of unnatural substances (detoxification) and vitamins are administered to build the immune system, enzymes are given to begin breaking down the protein shell which surrounds the cancer growth. Raw glandular products are also used to augment the body's natural glands.

*"The protein layer protects the cancer from the body's natural defense system."*

Vitamin B15 and Vitamin B17 (laetrile) are also given to the patient to work with the enzymes and immune system.

*"Initially laetrile was looked upon as useless, which it is when used by itself. However, in metabolic therapy, it works with the immune system and enzymes to destroy the already weakened cancer."*

**Metabolic therapy is an alternative, non-toxic form of cancer therapy that is being used in over 100 clinics throughout the United States.**

*"They don't get rid of the cause of the disease. When we look at cancer, we look at the cause. Once that's eliminated, the body will take care of the lumps and bumps itself."*

*"I think I've learned enough over the years to tackle some of the major diseases.*

*I may not find cures — I'm not egotistical enough to say I will. But I might, at least, be responsible for getting other scientists started in the direction of cures.*

*Polio has been practically wiped out, so has T.B. If I can play a part in the elimination of cancer and some of the other degenerative diseases, I will have done something worthwhile — I'll be satisfied.*

*In the end the truth will win out."*

— Harold W. Manner, Ph.D.

---

A special introductory package of information describing Metabolic Therapy has been prepared by Harold Manner, Ph.D. This includes his latest booklet "Facts About Metabolic Therapy" with particular reference to cancer, arthritis, and multiple sclerosis, plus a healthful dietary plan, application for therapy and application for membership.

Dear Dr. Manner,

I appreciate the work of the Metabolic Research Foundation. I would like the introductory package. Enclosed is my gift of:

\$5  
 \$10

\$25
