GP CONSULTATION PROTOCOL    July 2008

To obtain scripts for your patients, the scripts must be provided by an Australian registered medical practitioner. Dr. Alan Hadley from Cribb Street Medical Clinic, Brisbane, has agreed to provide this service for NITek complimentary practitioners and their patients. The medico-legal requirements for doing this require Dr. Hadley to have at least a phone consultation with the patient. (Cribb Street Medical will bill the patient $55 for this procedure).

This establishes a baseline medical file from which the initial scripting and follow-up procedures can flow. The patient information, four modes of test results (TSS, reflex time, RMR, temps) and practitioner notes form the valuable basis from which the patient file can be established. Any past information and blood test results would also be appreciated, but are not essential. Subsequent scripts for the same patients will only require the test results from the Thyroflex and the practitioners recommendation unless additional medical information is requested by Dr Hadley for that patient's specific needs. Additional phone consults will be available, but usually are only required if there are dosage complications.

RESPONSIBILITIES: The following defines the responsibilities of the parties involved.

1. Complimentary Practitioner
   - Obtain patient medical information and Thyroflex test result.
   - Fill out a request from (on your clinic letterhead) for Dr. Hadley consultation to review medical records and prescribe medication to patient.
   - For first time patient to Dr. Hadley, provide patient with BioPharm's contact information or business card and instruct patient to wait 3 days after their consultation with Dr. Hadley to call for BioPharm to confirm details to obtain their meds.
   - Returning patient with new script written by Dr. Hadley, ask patient to wait 2 days for the new script to get through to BioPharm, and then call BioPharm to confirm details to obtain their meds.

2. Dr. Alan Hadley
   - Upon receipt of consultation request from Complimentary Practitioner, Dr. Hadley's office will call the patient and arrange a consultation.
   - Dr. Hadley will review the patient medical information provided, conduct the consultation and prescribe according to the findings.
   - Dr. Hadley will fax BioPharm patient details and prescription, followed by mailing of the original copy of the prescription to BioPharm.
   - Dr. Hadley will fax a copy of the prescription to the Complimentary Practitioner confirming the above and a request for routine follow-up.
   - Dr. Hadley will prescribe refills of medicine for patient with updated Thyroflex patient report and any changes in patient's personal or medical information as supplied by Complimentary Practitioner.

3. BioPharm
   - BioPharm should expect a phone call from patient to provide billing information within 2-3 days after receipt of faxed patient details and prescription from Dr. Hadley. BioPharm will dispatch medicine directly to patient for pickup or delivery of medicine via mailing (additional cost to patient may apply for this service).

4. Patients
   - Contact BioPharm within 2-3 days after consultation with Dr. Hadley or after receiving a new prescription.
Complimentary Practitioner to fill out this form and print on their official clinic letterhead. Fax, email or send via an electronic form this request form and all pertaining patient medical information to:
