1. The patented innovative Thyroflex Thyroid testing device offers you, the patient, a non-invasive state of the art system for testing for thyroid disease, and the balancing of the core hormones that support and interact with the thyroid, as you cannot treat the thyroid alone.

2. According to Sir Dr. R. I. S. Bayliss a famous Endocrinologist with the foremost Lister Hospital in London, England, Endocrinologist to the British Royal Family - “All Thyroid blood tests are not accurate in determining the thyroid function”. The only way to determine thyroid disease is from reflexes and symptoms”. The Thyroflex uses reflexes and symptoms to determine illness.

3. **18% of the thyroid hormone** (T3) can be found in the blood!! So the chances of detecting Thyroid disorders in the blood are low, as it is not comprehensive enough.

4. However, the Thyroflex tests the end artifact of the thyroid function (FT3). **With a 98% chance of getting it correct!!!** The thyroid determines the rate at which your heart beats, and how many calories per day you will burn at rest, and the quality of your life.

5. The Thyroflex test measures the neurotransmitter speed (brain function), the reflex speed, and the resting metabolic rate (RMR). We combine these results with your symptoms.

6. For our Specialist Doctors to make your thyroid work correctly, say it is underactive hypothyroid - we have to make sure the other hormones, which we term **“The Core Hormones”**, are functioning correctly also. These hormones include the stress hormones (Cortisol, GABA, Pregnenolone, DHEA, D3, B’s) the sleep hormones (Magnesium, Tryptophan, serotonin, and Melatonin) the cancer prevention - Iodine/iodide and CoQ10 & ACTH.

7. Iodine/iodide is the only essential element that can convert T4 to T3 and free it up for intracellular use FT3/T4. (FT3/T4 is the only form that the body can use, and with not enough iodine/iodide on board, you will feel just terrible).

8. **Sleep Hormones** (Melatonin, Serotonin, and Tryptophan, combined with Magnesium) is essential to get the correct amount, and quality, of sleep. Not enough sleep and you cannot function in a sane logical manner.

9. CoQ10 (although there are many other great benefits) the primary uses are for stamina and to regulate the heartbeat.

10. **The Thyroflex test is 98.5% accurate.** Thyroid disease is primarily **hereditary.** That is, if your Mother or Father has/had a thyroid disorder, you and your children have a high probability of inheriting it. It is **not your fault;** you have done nothing wrong to get to this point. Most general practitioners look at a blood marker TSH. This does not tell you what is happening with your thyroid.

    What has happened is that you have all the symptoms, i.e. where you can **feel cold, tired, fatigued, worn out, brain doesn’t function properly, constipated, and your hormones do not work properly.** Therefore, you are sick and tired of being sick and tired. You seek help; you know that something is not right; you visit your general practitioner, who does a blood test (TSH) with an 18% chance of diagnosing you? You have the symptoms that are usually ignored as the blood tests said that you are normal, then your Doctor will classify you as being “sub-clinical hypothyroid”. What this means is that you have all the symptoms, but your blood tests appear to be normal. TSH is important as it is like the oil in the car, but what they should have been looking for, is how much petrol you have to run your car. We look at the petrol. (Reflexes, Metabolic rate, and symptoms).

11. Once the test has been completed, we can determine whether you are hypo, hyper, or Euthyroid.

12. **About 10% of the patients we test we may have to do some extra blood tests.** These tests are necessary as we may suspect you of having an auto-immune disease. Reverse RT3, Hashimoto’s, or Graves’ disease. They require a very specific and different treatment program.
13. For vegetarians, the natural bio identical thyroid hormones we use have no meat product in them; only the active Thyroid hormones are extracted, and purified, as a chemical compound. By law, no animal product can be present with the hormones.

14. **Our Specialists first line of defense is to use all natural Bio identical medications, only if the particular disorder requires synthetic medications will they be used (for example in the case of HASHIMOTO’S)**

15. Nitek has had enormous success internationally with the **THYROFLEX Core Hormone Protocol**: it is used and endorsed by the top Specialty Centers around the world such as The Hall Center, Holtorf Medical Group etc. We have been on countless Radio and TV shows, including The Dr. Phil Show, The Today Show, The Doctor’s Show, and the Discovery Channel, and have been written about in many books such as Dr Jeffery Dach – Hormones 101, Susanne Somers – Breakthrough, Dr. Simpson … etc.

1. **For most of you, we need to “titrate” your thyroid meds - that is, to adjust your medications slowly (until you are “at dose”, that means being on the correct amount of medication). As some patients will not feel their best until they are at the correct dosage. We are dealing with prescription medications, and we cannot raise your dosage up too fast. This is how we do it -**
   a. **First visit**: you are screened by your practitioner. Your medical notes are sent to our scripting specialist doctor in the USA. You make an appointment via our Nitek Virtual Clinic (NVC) with our Specialist Doctor. The Specialist Doctor will consult with you in a virtual office face to face visit, and prescribe the necessary medications to balance your core hormones. (We only specialize in core hormones.)
   b. **30 days later, after you start the medication, we must retest you to evaluate your improvement; our Specialist Doctor will alter your medications as necessary.**
   c. We will **continue** to do this until you are on the correct dosage and you **feel a remarkable improvement** to your well-being.
   d. **According to our clinical trials, most patients will end up on 2 to 3 grains (this will take 2 to 3 visits). To renew your prescription, you must be tested every 180 days. It takes us about 14 days to have your med prescriptions ready and sent out to you. To get a renewal for your meds you must schedule a follow-up appointment with our consulting Specialist Doctor via NVC. Then meds will be dispatched yet again.**

> Here are a few of the risks of not having your thyroid treated. There are too many to list all.

   - Headaches
   - Arthritis - pain
   - Heart problems
   - Sleep apnea - sleep problems
   - Diabetes
   - Low Blood pressure
   - Depression
   - Alzheimer’s and Parkinson’s like diseases
   - Miscarriage, Difficulty falling pregnant, Pre-mature birth, and pregnancy complications

---

**1. Dr. Cheryl & Dr Noemi are the USA SPECIALISTS who you will be consulting with by a visit the Nitek Virtual Clinic (NVC) – they are fully licensed and fully registered BOARD CERTIFIED MEDICAL DOCTORS. They carry the title N.M.D., (considered a GP) and is equivalent in Europe to a GP, (General Practitioner). They have the same education and the same medical boards as a GP, and a fully licensed doctor. They are fully trained and are legally able to write prescriptions as a GP. In addition to this, Dr. Cheryl & Dr Noemi are also a qualified (Duel Qualifications) as a Naturopath Doctor & a Allopathic Medical Doctor (GP) . They fully understand and are able to treat patients holistically. This gives Dr. Cheryl & Dr Noemi the ability to treat the patient with natural or synthetic medications depending on the patient’s tests done in Europe on the THYROFLEX MACHINE and their readings. In addition to this, Dr. Cheryl & Dr Noemi have been through extensive training as a Specialist (the same as a specialist for any branch of medicine in Europe) and are fully trained as hormone specialists, and have a unique understanding of how the hormones integrate into the endocrine system.**

**2. At Nitek we need the ability of fully integrated Doctor Specialists to fully understand both disciplines natural and allopathic, as both disciplines have to be understood to treat these complicated diseases 100% successfully. This is new cutting edge science, and hence takes thinking out of the box medicine practices to make our patients well again). We are cutting edge with THYROID DETECTION, AND TREATMENT WITH THE ASSOCIATED SUPPLEMENTS NECESSARY FOR THE UPTAKE OF THE THYROID MEDS – in Balancing of the core hormones, they all work in synergy, to make you feel better faster!**
